## From the capture mode, you can select the element for which you want to add a step

Each element after being captured or hovered over, shows a digit confidence score scale. This helps a user to select an element which is more likely to be found by MyGuide

It is useful when there are many labels with the same text but their background properties differ so adding the label's jQuery uniquely identifies the element

1) For example, we have entered the jQuery for Login button

		Elements Console Sources	Network » 01 41 🔅 : X
		<input class="input r4 wi&lt;br&gt;id=" name="pw" o<br="" password"=""/> autocomplete="off">	de mb16 mt8 password" type-"password"  hkeypress="checkCaps(event)"
		>div id="pwcaps" class="m	<pre>b16" style="display:none"&gt; ide primary" type="submit" id="Login" n"&gt; == \$0</pre>
	salesforce	<pre></pre>	<pre>remember"&gt; 6 mb20"&gt; nk" class="f1 small" href="/secur/</pre>
		#wrapper #content #theloginform #login_	form input#Login.button.r4.wide.primary

### You can select the suitable option when you need to perform a task and then select the element

For example, sometimes an element shows something else when hovered over. We use this option if we need to capture the element which shows up later and not the parent element

1) There are two delay capture options - 5 and 10 seconds

Select a Mode	Start your free trial. No credit card required, no software to install.
iQuery Selector CV	You can select the suitable option when you need to perform a task and then select the element For example, sometimes an element shows something else when hovered over. We use this option if we need to capture the element which shows up later and not the parent element
