

Forward mode

myguide.org

Forward mode is used to reduce the number of clicks as it runs the in-app guide automatically

For this, we need to enable the option from Organization Settings, then every step will show a forward button while playing

If we want to keep this option disabled in some guides of any folder, we will have to disable it from guide level settings individually

Branding Embed Code Midget Widget Video Selector Setimas Step I we want to keep this option disabled in some guides of any folder, we will have to disable it from guide level settings individually Notification Features Exit Survey	Settings		×
