myguide

How to Enable Forward Mode

myguide.org

Forward mode is used to reduce the number of clicks as it runs the in-app guide automatically

For this, we need to enable the option from Organization Settings, then every step will show a forward button while playing

Click on the "Navigation icon"

If we want to keep this option disabled in some guides of any category, we will have to disable it from guide level settings individually

To do this we have to edit the guide
