

Inline step section: "Choose when to proceed to the next step"

Step: 01

On Click of Next Button

When you select 'On Click of Next Button', the next step advances on clicking on next button visible on the pop-up

The screenshot shows a configuration interface for a pop-up. On the left, a white box titled "On Click of Next Button" contains the text: "When you select 'On Click of Next Button', the next step advances on clicking on next button visible on the pop-up". To the right, a grey panel titled "Choose when to proceed to the next step" lists various triggers. The first option, "On click of 'Next' button", is highlighted with a red border. Other options include "On click of the selected element" (with sub-options: Default, Page reloads, Opens new tab/window, Continue in parent window), "On hover over the selected element", "On click anywhere on the page", "On typing, wait 1 second(s)", "On change of selection", "After 4 second(s)", "On right click on the selected element", and "On click anywhere on the page, pause this guide".

On Click of Next Button

When you select 'On Click of Next Button', the next step advances on clicking on next button visible on the pop-up

Choose when to proceed to the next step

- On click of "Next" button
- On click of the selected element
 - Default
 - Page reloads
 - Opens new tab/window
 - Continue in parent window
- On hover over the selected element
- On click anywhere on the page
- On typing, wait 1 second(s)
- On change of selection
- After 4 second(s)
- On right click on the selected element
- On click anywhere on the page, pause this guide

Step: 02

On Click of the selected element

When you select 'On click of selected element', the next step advances only on clicking of that particular selected element

However, when the next step opens in a new tab or advances after page reloads, you need to select the respective options

On Click of the selected element
When you select 'On click of selected element', the next step advances only on clicking of that particular selected element

Choose when to proceed to the next step

- On click of "Next" button
- On click of the selected element
 - Default
 - Page reloads
 - Opens new tab/window
 - Continue in parent window
- On hover over the selected element
- On click anywhere on the page
- On typing, wait 1 second(s)
- On change of selection
- After 4 second(s)
- On right click on the selected element
- On click anywhere on the page, pause this guide

However, when the next step opens in a new tab or advances after page reloads, you need to select the respective options

Step: 03

On hover of selected element

When you select 'On hover of selected element', the next step advances only when you hover on that particular selected element

The screenshot shows a configuration menu titled "Choose when to proceed to the next step". On the left, there is a small white box with the title "On hover of selected element" and a plus icon. Inside this box, it says: "When you select 'On hover of selected element', the next step advances only when you hover on that particular selected element". Below this text is a small location pin icon. The main menu contains several radio button options:

- On click of "Next" button
- On click of the selected element
 - Default
 - Page reloads
 - Opens new tab/window
 - Continue in parent window
- On hover over the selected element (highlighted with a red box)
- On click anywhere on the page
- On typing, wait second(s) ⓘ
- On change of selection
- After second(s)
- On right click on the selected element
- On click anywhere on the page, pause this guide

Step: 04

On click anywhere on the page

When we select "On click anywhere on the page" and user clicks anywhere on the page, the next step plays

The screenshot shows a configuration panel titled "Choose when to proceed to the next step". On the left, a tooltip explains the "On click anywhere on the page" action. The main panel lists several options, with "On click anywhere on the page" highlighted by a red box.

Choose when to proceed to the next step

- On click of "Next" button
- On click of the selected element
 - Default
 - Page reloads
 - Opens new tab/window
 - Continue in parent window
- On hover over the selected element
- On click anywhere on the page
- On typing, wait second(s) ⓘ
- On change of selection
- After second(s)
- On right click on the selected element
- On click anywhere on the page, pause this guide

On click anywhere on the page⁺
When we select "On click anywhere on the page" and user clicks anywhere on the page, the next step plays

Step: 05

On typing, wait for n seconds

When you select 'On typing', the next step advances on typing text in the selected text box. The "n" seconds is the MyGuide wait time after user stops trying. The default time is 1 seconds, you can choose a greater value for long text areas, and lesser value for smaller text fields

On typing, wait for n seconds

When you select 'On typing', the next step advances on typing text in the selected text box.

The "n" seconds is the MyGuide wait time after user stops trying. The default time is 1 seconds, you can choose a greater value for long text areas, and lesser value for smaller text fields

Choose when to proceed to the next step

Step: 06

On change of selection

When you select 'On change of selection', the next step advances when you select any field from the dropdown and the value changes

The screenshot shows a configuration panel titled "Choose when to proceed to the next step". On the left, there is a small white box with the title "On change of selection" and a plus icon. The text inside reads: "When you select 'On change of selection', the next step advances when you select any field from the dropdown and the value changes". Below this text is a small location pin icon. The main configuration panel has a light gray background and contains the following options:

- On click of "Next" button
- On click of the selected element
 - Default
 - Page reloads
 - Opens new tab/window
 - Continue in parent window
- On hover over the selected element
- On click anywhere on the page
- On typing, wait second(s) ⓘ
- On change of selection
- After second(s)
- On right click on the selected element
- On click anywhere on the page, pause this guide

Step: 07

After 'n' seconds

When you select "After 'n' seconds", the step will complete after number of seconds selected

Choose when to proceed to the next step

- On click of "Next" button
- On click of the selected element
 - Default
 - Page reloads
 - Opens new tab/window
 - Continue in parent window
- On hover over the selected element
- On click anywhere on the page
- On typing, wait second(s) ⓘ
- On change of selection
- After second(s)
- On right click on the selected element
- On click anywhere on the page, pause this guide

After 'n' seconds ⓘ
When you select "After 'n' seconds", the step will complete after number of seconds selected

Step: 08

On right click of selected element

When you select 'On right click of selected element', the next step advances only on right click on that particular selected element

Choose when to proceed to the next step

- On click of "Next" button
- On click of the selected element
 - Default
 - Page reloads
 - Opens new tab/window
 - Continue in parent window
- On hover over the selected element
- On click anywhere on the page
- On typing, wait second(s) ⓘ
- On change of selection
- After second(s)
- On right click on the selected element
- On click anywhere on the page, pause this guide

On right click of selected element ⓘ
When you select 'On right click of selected element', the next step advances only on right click on that particular selected element

Step: 09

On click in a page, pause this guide

When you select 'On click in a page, pause this guide', the guide doesn't advance if you click anywhere on the page until you click on the Resume button that will be available in the top

left corner of the page

Choose when to proceed to the next step

- On click of "Next" button
- On click of the selected element
 - Default
 - Page reloads
 - Opens new tab/window
 - Continue in parent window
- On hover over the selected element
- On click anywhere on the page
- On typing, wait second(s) ⓘ
- On change of selection
- After second(s)
- On right click on the selected element
- On click anywhere on the page, pause this guide

On click in a page, pause this guide

When you select 'On click in a page, pause this guide', the guide doesn't advance if you click anywhere on the page until you click on the Resume button that will be available in the top left corner of the page

Thank You!
