

Step Customization

Step: 01

Step Popup Position

Step popup width and height options are present in Image, Message and Inline step panels

1) Light green shade suggests the availability of positions and in case a position is unavailable, it will be shown in light grey shade 2) By default the step popup width is 300 pixels. The minimum & maximum popup width is 250 and 1000 pixels and minimum & maximum popup height is 100 and 1000 pixels

The screenshot displays the configuration interface for a step popup. It includes a title bar, a list of trigger events, a 'Step Popup Position' section with a grid of position indicators, and an 'Element Matching Settings' section with 'Width' and 'Height' input fields. Three callout boxes provide additional context: one explains the meaning of light green and light grey shades in the position grid; another shows the default width of 300 pixels and the height of 0 pixels; and a third reiterates the default width and the minimum and maximum width and height values.

Step Popup Position

Step popup width and height options are present in Image, Message and Inline step panels

Choose when to proceed to the next step

- On click of "Next" button
- On click of the selected element
 - Default
 - Page reloads
 - Opens new tab/window
 - Continue in parent window
- On hover over the selected element
- On click anywhere on the page
- On typing, wait 1 second(s)
- On change of selection
- After 4 second(s)

Step Popup Position

Light green shade suggests the availability of positions and in case a position is unavailable, it will be shown in light grey shade

Width 300 px
Height 0 px

By default the step popup width is 300 pixels. The minimum & maximum popup width is 250 and 1000 pixels and minimum & maximum popup height is 100 and 1000 pixels

Element Matching Settings

Cancel Save & Next Save

Step: 02

Screen Visibility Settings

- 1) If you want to hide a particular area while playing the step or any media file, click "Select Area"
- 2) Opacity scale varies from 0 (lightest) and 10 (darkest). Move the circular toggle towards right to increase the opacity

Step: 03

For a message step, the popup style for the main step is different

But when we select a tooltip, the position selector will be same as inline's. In this case the light grey shade suggests the available positions

The screenshot displays the configuration interface for a message step. A central dialog box titled "Step Popup Position" is highlighted with a red border. It features a 3x3 grid of position selectors, with the center one highlighted in green. To the right of the grid are input fields for "Width" (300 px) and "Height" (0 px). Below the dialog, the "Select Tooltips" section contains a "Select" button. The "Automation Settings" section has a checkbox for "Requires human interaction". The "Screen Visibility Settings" section includes an "Apply Opacity" slider set to 0. The "Hide Sensitive Area" section has a "Select Area" button. The "Advanced Settings" section has checkboxes for "Hide previous button" and "Delay step playback". At the bottom are "Cancel", "Save & Next", and "Save" buttons. To the right, a preview of a message step shows a white box with a location pin icon and the text: "For a message step, the popup style for the main step is different". Below this text is another location pin icon.

Step: 04

In case of message and image steps, the placing of some options is different than that of an inline step

Thank You!
