

How to change theme in ServiceNow

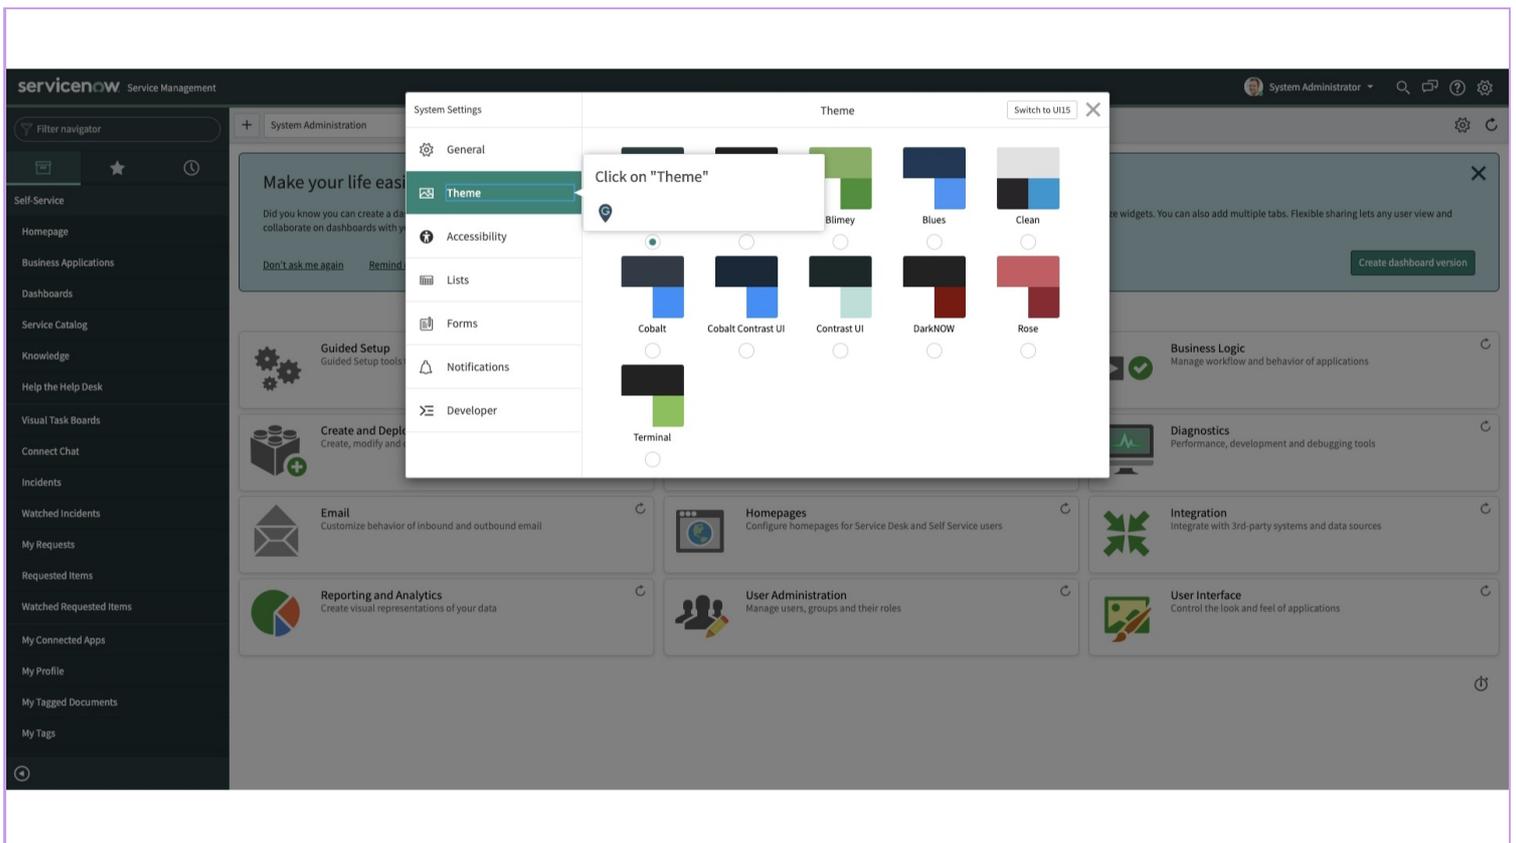

Step: 01

Log in to ServiceNow, Click on "Settings".

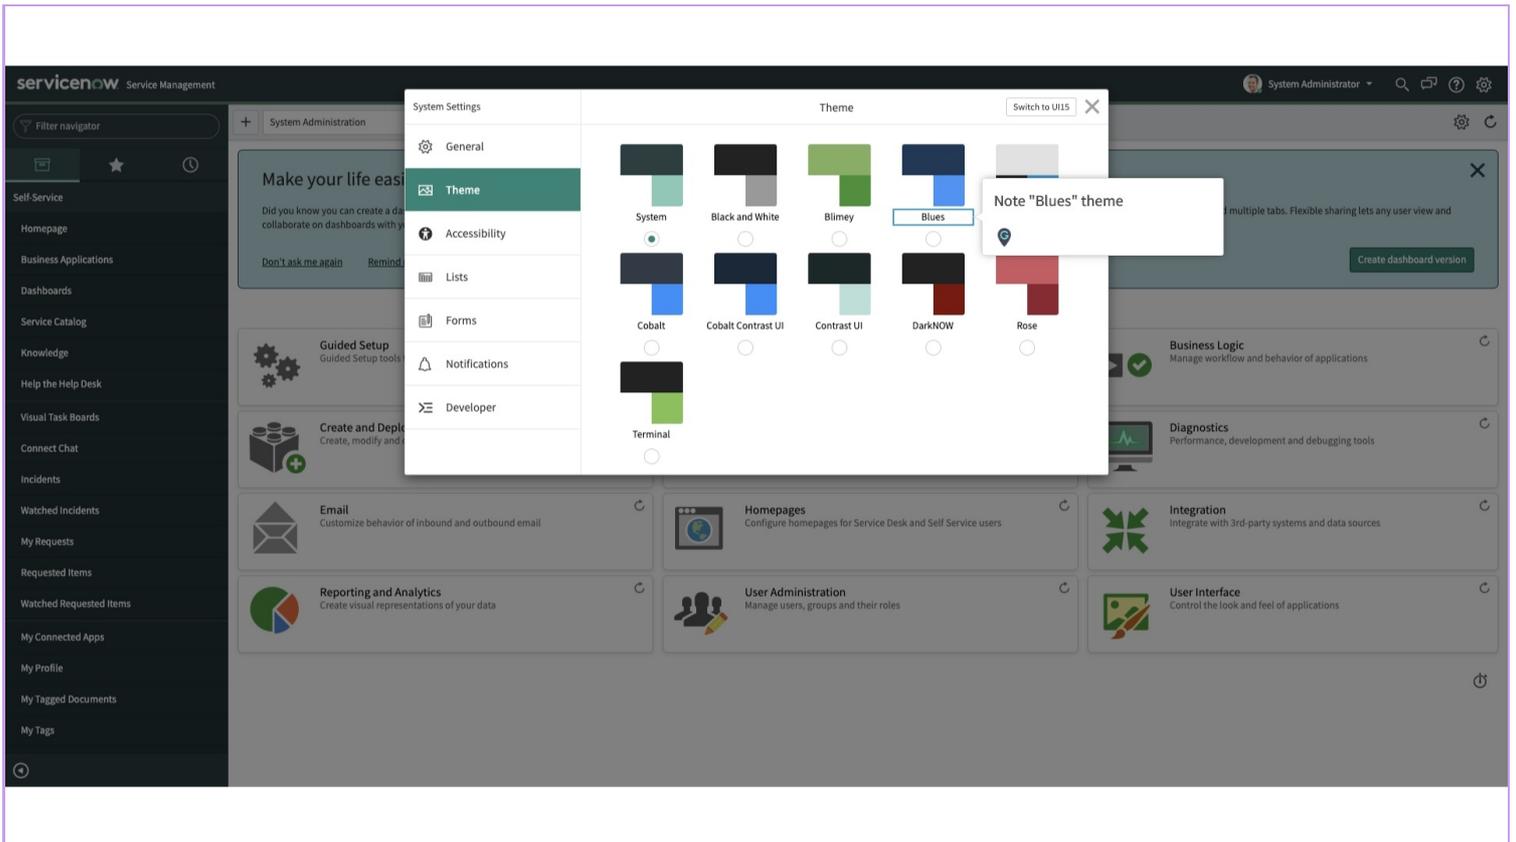

Step: 02

Click on "Theme"

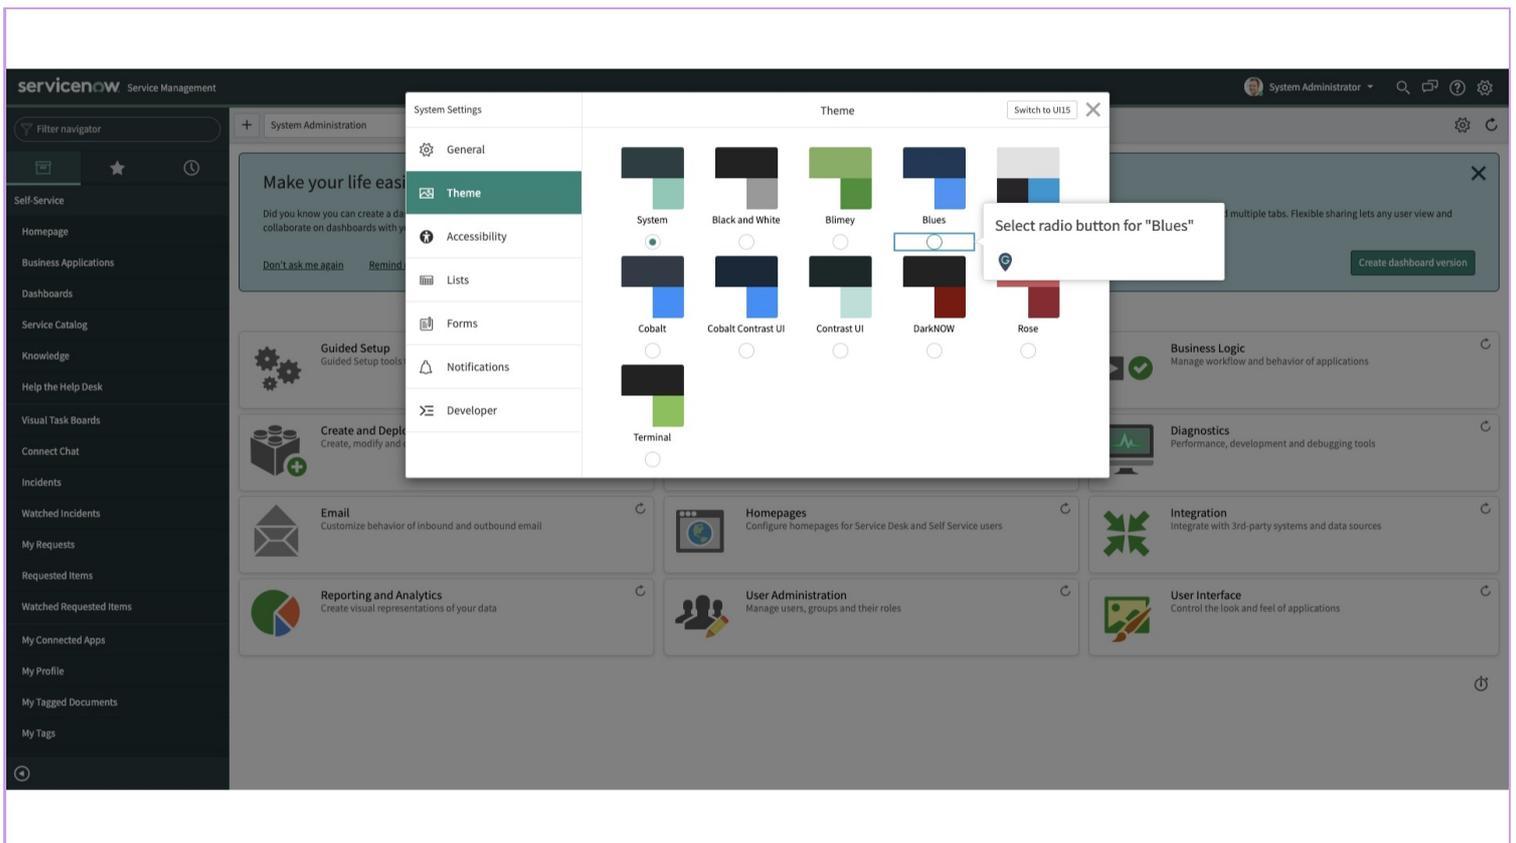

Step: 03

Note "Blues" theme

Step: 04

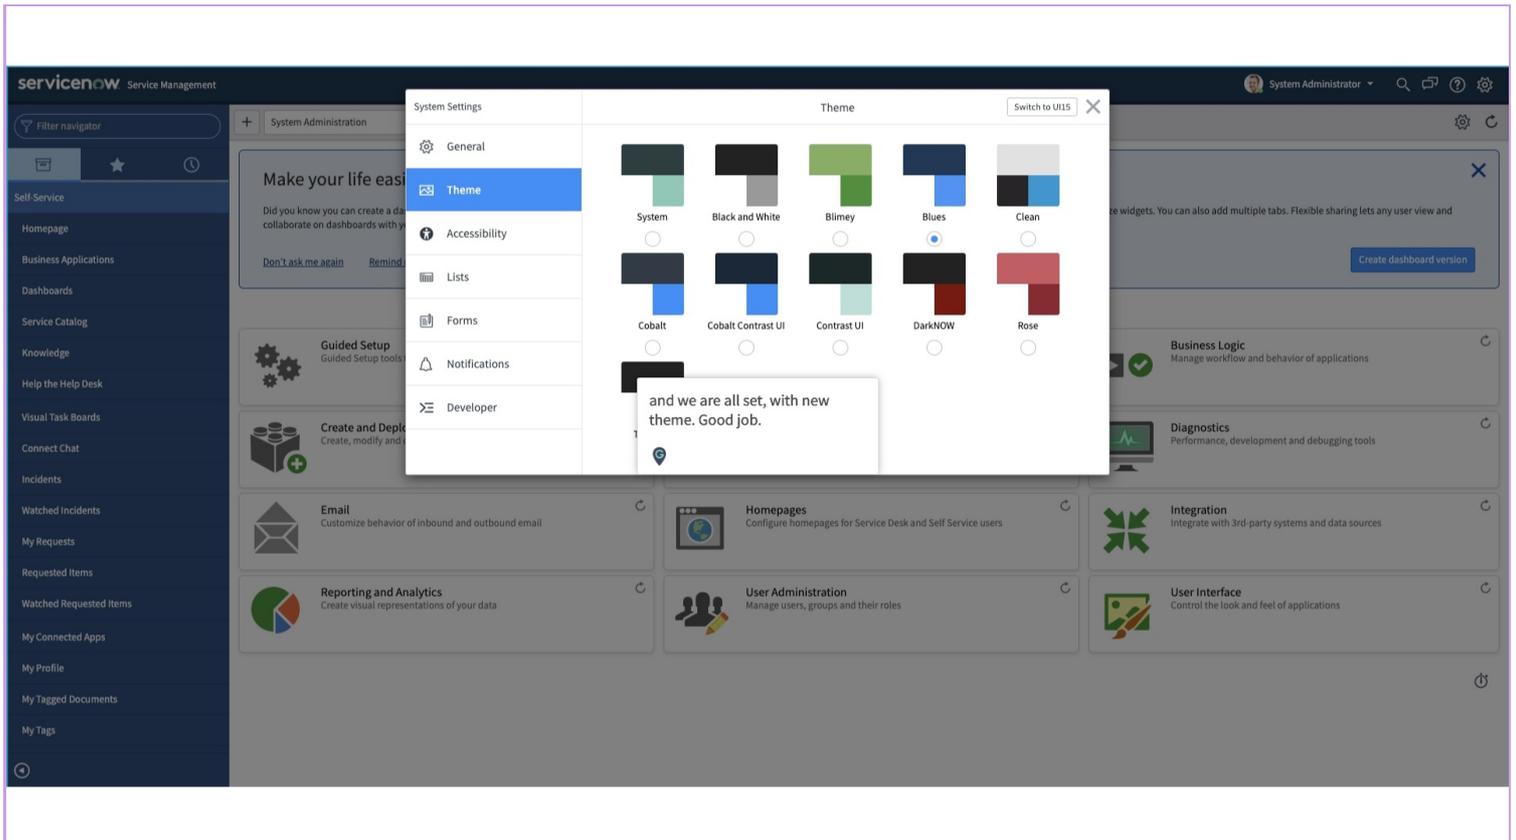

Select radio button for "Blues"

The screenshot displays the ServiceNow System Administration interface. A 'System Settings' dialog box is open, showing the 'Theme' configuration page. The 'Theme' section is highlighted in the left-hand navigation menu. The 'Theme' page displays a grid of theme options, each with a preview and a radio button. The 'Blues' theme is selected, and a callout box points to its radio button with the text 'Select radio button for "Blues"'. The themes shown are System, Black and White, Blimey, Blues, Cobalt, Cobalt Contrast UI, Contrast UI, DarkNOW, Rose, and Terminal. The background shows the ServiceNow dashboard with various widgets like 'Email', 'Reporting and Analytics', 'Homepages', 'User Administration', 'Integration', and 'User Interface'.

Step: 05

and we are all set, with new theme. Good job.

Thank You!
