

How to enable auto-launch of an app when you sign in to Okta

## Step: 01

# Welcome!

In this Guide we will learn how to enable auto-launch of an app when you sign in to Okta

## Step: 02

Hover on an app which you want to enable for auto-launch and click on the gear icon

## Step: 03

Click on "General"

## Step: 04

Select this check box to enable auto-launch of this app after sign in

The screenshot displays the Okta Admin Console interface. A modal window titled "1and1 E-mail Settings" is open, showing the "General" tab. The "App name" field is set to "1and1 E-mail". The "Auto-launch" section contains a checkbox labeled "Launch this app when I sign in to Okta", which is highlighted with a red box. A callout box points to this checkbox with the text: "Select this check box to enable auto-launch of this app after sign in". The background shows the Okta dashboard with a search bar, navigation links, and a list of applications.

## Step: 05

Click on "Save" and you're done!

The screenshot displays the Okta admin interface. At the top, there is a navigation bar with the Okta logo, a search bar labeled 'Launch App', and user information for 'Aishwarya'. A '+ Add Apps' button and an 'Admin' button are also visible. The main content area shows a 'Work' section with a card for '1and1 E-mail'. A modal dialog titled '1and1 E-mail Settings' is open, featuring three tabs: 'See Password', 'Update Credentials', and 'General'. The 'General' tab is selected, showing the 'App name' field set to '1and1 E-mail' and an unchecked 'Auto-launch' checkbox. Below these fields are 'Delete', 'Save', and 'Cancel' buttons. A green tooltip with a location pin icon points to the 'Save' button, containing the text 'Click on "Save" and you're done!'. The footer of the page includes links for 'Request an app', 'Help: aishwaryak+okta@edcast.com', and 'Get the Mobile App', along with copyright information for Okta, Inc.
